CAREER OBJECTIVES

A motivated and dedicated Information Technology student seeking an On-the-Job Training (OJT) opportunity where I can apply my technical knowledge, enhance my practical skills, and gain real-world experience in web technologies, and various areas of the IT industry. Eager to learn more from professionals, contribute to team objectives, and grow as a future IT professional.

TECHNICAL SKILLS

- Programming (Java)
- Web Technologies (Tailwind & Javascript, Wordpress)
- System & Hardware (Basic troubleshooting, OS installation)
- Version Control (Basic Git/GitHub)
- UX Design Tools (Canva, Figma, Photoshop)
- Database Management: MySQL (CRUD operations)
- IT Concepts: (Basic cybersecurity awareness, virtual machines (VMs) and virtualization concepts)

SOFT SKILLS

- Good communication and interpersonal skills
 - Problem-solving and logical thinking
 - Willingness to learn and adapt
 - Team collaboration
 - Time management
-

EXPERIENCE

System Analyst – Capstone Project
(<https://greensync.garden/>)

Nov 2024 - Oct 2025

- Analyzed system requirements and worked with the team to design a web based application.
- Created flowcharts, process diagrams, and documentation for system design.
- Conducted testing to ensure system functionality and usability.
- Coordinated with team members to solve technical challenges and meet project milestones.

Assistant Programmer – Unity Game Classroom Project (2025)

Aug - Nov 2025

- Assisted in developing a game using Unity, collaborating with the main programmer and design team.
 - Implemented basic scripts using C# and helped integrate features into the game environment.
 - Conducted testing and debugging to ensure smooth gameplay and functionality.
 - Coordinated with team members to troubleshoot technical issues and optimize code performance.
-
